## COMPANY PROFILE

The management and billing of utilities remains a constant challenge.

We can help you with a comprehensive utility management platform which will not only save you money but also avoid inaccurate billing and time-wasting paperwork.

### Urbtec Utility Management

This platform is a proven cloud based micro-utility solution for the residential and commercial property markets. Urbtec empowers utility operators to efficiently implement, maintain and manage utility networks for their customers, which can be municipalities, property managers, body corporates or home owners associations or privately owned residential areas.

The Urbtec world-class platform provides a solution for automatically collecting meter readings through smart meters, managing utility metered networks and collecting utility income from tenants and residents.

Urbtec was founded by Johan Stander and Francois du Plessis, with the purpose to focus on providing solutions to the utilities sector in South Africa and abroad. Urbtec's solutions has deep roots and evolved from technology that was built over the past decade. The founders joint 50+ years experience in the software and IT industry boosted with talented young professionals who has joined the company, provides Urbtec with agility and positions it to respond to the demands of the industry and market place.

CONNECT | ANALYSE | SIMPLIFY

Recognising and responding to the various demographics and trend within the utility industry resulted in Urbtec providing multiple deployment models within the same ecosystem to enable application of technology across all sectors of the utility landscape.

## Deployment models

### Manual Meter Reading

Capturing utility meter reading data manually is a tedious and error-prone task. Urbtec's mobiXT mobile app eliminates all paperwork and minimises human intervention. Accuracy is improved with in-field entry validation, meter image capturing and automated bill calculation.

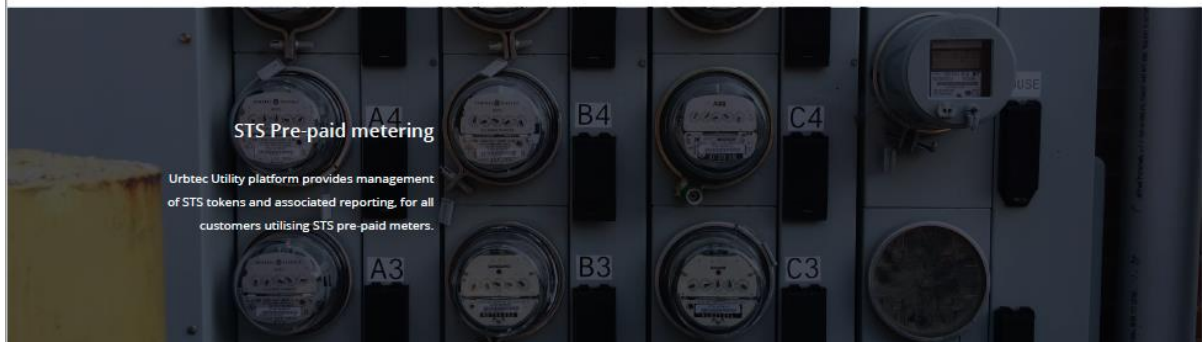

### Smartwallet

Provide alternative to standard prepayment systems for payment of accounts. Urbtec smartwallet combines a realtime view on utility charges, any additional monthly charge like rent or levies, and a convenient payment solution into one mobile application.

### STS Pre-paid metering

Urbtec Utility platform provides management of STS tokens and associated reporting, for all customers utilising STS pre-paid meters.

The Urbtec solutions have been deployed at numerous utility sites throughout the country with various success stories on how the management of utilities were improved.
