RubberRoofsTM

The Trusted Name In Waterproofing.

WHO WE ARE

RubberRoofs™ is a proudly South African company, established in 2018. RubberRoofs™ delivers only the best quality waterproofing solutions. Our superior RubberTech™ Liquid Rubber Paint™, developed in partnership with world class laboratories is of an exceptional standard, this coupled with our high-quality workmanship, attention to detail and professionalism, sets us apart from our competitors.

RubberRoofs™ was established in response to a growing demand for optimal waterproofing products that withstand the harsh African elements and the essential need for professional application that adheres to the strict standards set by RubberRoofs™.

RubberRoofs™ is the solution to protect your property against the elements, without harming the environment.

VISION

Our aim at RubberRoofs™ is to be the market leader and household name in waterproofing in Southern Africa, servicing the residential, commercial and industrial markets by upholding premium standards and keeping our customers' needs as the core focus of our business.

MISSION

Our mission at RubberRoofs™ is to grow from strength to strength, while maintaining our reputation as the trusted provider of class leading, cost effective and environmentally friendly waterproofing solutions to South Africans and to provide exceptional customer service, built on trust.

At RubberRoofs™ we work hard to create an environment that provides both the company and its employees with opportunities to create a successful future.

RubberRoofs™ is focused on giving our clients the best possible service, with the best possible results. This is why we made the decision to not retail our RubberTech™ Liquid Rubber Paint™.

WHY CHOOSE US

RubberRoofs™ provides South African buildings with a new lease on life by providing excellent, locally produced, Liquid Rubber Paint™ waterproofing solutions and full-service, warrantied application.

RubberRoofs™ is The Trusted Name in Waterproofing.

Company Culture

At RubberRoofs™ we have created a company culture based on trust in one another and in our product. Establishing a trustworthy relationship between RubberRoofs™ and its clients is essential in providing them with peace of mind and a pleasant experience.

Experience

RubberRoofs™ has successfully waterproofed a large number of residential, commercial, and industrial projects. This gives our clients the peace of mind that only excellence is good enough, no matter the sector.

Nationwide

RubberRoofs™ has a solid national footprint. Our expert representatives and applicators operate from major centres in the North, South, Central and Coastal regions of South Africa and we are always just a phone call away.

10-Year Product Warranty

Using only the highest quality materials, RubberTech™ liquid rubber paint is developed in partnership with world class paint specialists and chemists, to be an industry leading product. Due to the ever-changing global climate and external factors, RubberRoofs™ understands the importance of continuous product development and innovation, constantly looking for ways to better our product, adapting to even the most severe weather conditions. To ensure effective preparation and application and to be able to confidently stand by our 10-year product warranty, RubberTech™ liquid rubber paint is not available as a retail product. RubberRoofs™ is confidently backed by its 10-year product warranty to give our clients peace of mind.

Thorough Preparation

RubberRoofs™ understands the application of waterproofing and ensures RubberRoofs™ applicators adhere to impressive standards of preparation and application. At RubberRoofs™ we only use the best quality products for the crucial preparation stage of your roof. RubberRoofs™ membranes are non woven continuous filament geotextile substrate, specifically developed to bidim® civil engineering grades. RubberRoofs™ applicators also use FiberPrep™, enhanced with cellulose fibres that add strength in elasticity where tile edges are sealed or minor cracks are bridged. RubberRoofs™ range of high performance penetrating bonding liquids are formulated with the highest quality raw materials, increasing substrate strength and durability, inhibiting decay and with added alkali resistance.

OUR PRODUCTS

RubberRoofs™ proprietary products are developed in partnership with world renowned laboratories to be exceptional, utilising only the best accredited raw material and are always designed to exceed expectations.

RubberTech™ Liquid Rubber Paint™

RubberTech™ Liquid Rubber Paint is RubberRoofs™ expertly formulated liquid rubber paint with highly flexible, pure acrylic that has high scrub resistance and with only the best quality additives and pigments. Accredited as a hyper premium waterproofing solution and designed to, with correct application, exceed its warranty as a long-life waterproofing sealant.

AlgenTech™ XE Protect

RubberRoofs™ applicators sanitise the surface with AlgenTech™ XE Protect. Our dry state microbial fungus and algae attack protector is added to the liquid rubber paint to inhibit future organism growth. This process increases the efficacy of waterproofing.

RostTech™ Rust Treatment

RostTech™ rust converter is our expertly formulated, full function, water-based rust converter. With thorough preparation, RostTech™ Rust Treatment penetrates deeper into rust than standard converters, converting it into a stable, inert ferric phosphate compound that forms an effective barrier layer of protection from further corrosion.

ThermoTech™ Cool Roof Technology

Next generation ThermoTech™ Titanium liquid rubber paint effectively reflects up to 85% of infrared solar radiation and convects heat instead of transferring it into the building. ThermoTech™ Cool Roof Technology substantially contributes to a building's process efficiency, comfort and has benefits of saving on energy and running costs.

BulletProof™ Bitumen Coat

RubberRoofs™ BulletProof Bitumen Coat System is expertly designed as a barrier over bitumen/torchon and under Liquid Rubber Paint™ to help inhibit bitumen bleed. This process significantly lengthens the lifetime of your waterproofing.

AsbestoSeal™ Advanced Asbestos Encapsulator

Asbestos fibers become loose with weathering and is a health hazard. RubberRoofs™ AsbestoSeal™ is formulated to encapsulate and bind asbestos fibers. AsbestoSeal™ is also formulated with moss, algae and fungal growth inhibitors.

SURFACE COMPATIBILITY

RubberTech™ Liquid Rubber Paint™ has exceptional adhesion on a wide variety of suitably prepared roofing substrates, including:

- Tiles
- Asbestos
- Asphalt shingle
- Concrete, built-up, multiple layered ballast or smooth membrane
- Metal and IBR

BEFORE

AFTER

RubberTech™ Liquid Rubber Paint™

AlgenTech™ XE Protect

Impermeable Barrier

RubberTech™ Liquid Rubber Paint™ creates an impermeable waterproofing barrier, keeping your asset protected for ultra-long time periods.

Flexible

Liquid Rubber Paint™ has excellent elongation capabilities, flexing and stretching with the substrate as it heats and cools.

Increased Property Value

A RubberRoofs™ application increases the longevity of your roof, improves the overall aesthetics and significantly increases the value of your property.

Highly Adhesive

RubberRoofs™ RubberTech™ Liquid Rubber Paint™ is expertly formulated to be applied to a wide variety of substrates including concrete, stone, asbestos and metals as a long-life sealant.

UV and IR stable

RubberRoofs™ RubberTech™ Liquid Rubber Paint™ is designed specifically for the harsh South African climate and displays excellent UV stability and Infra-Red handling characteristics. This allows our product to maintain its strength and flexibility for longer.

Highly Durable

RubberTech™ Liquid Rubber Paint™ formulations and production processes are overseen by a world renowned laboratory to be best-in-class and to exceed expectations, with optimal waterproofing ability and colour retention. RubberRoofs™ The Trusted Name in Waterproofing™

Expert Application

RubberRoofs™ applicators understand waterproofing and adhere to impressive standards during the vital preparation and application process.

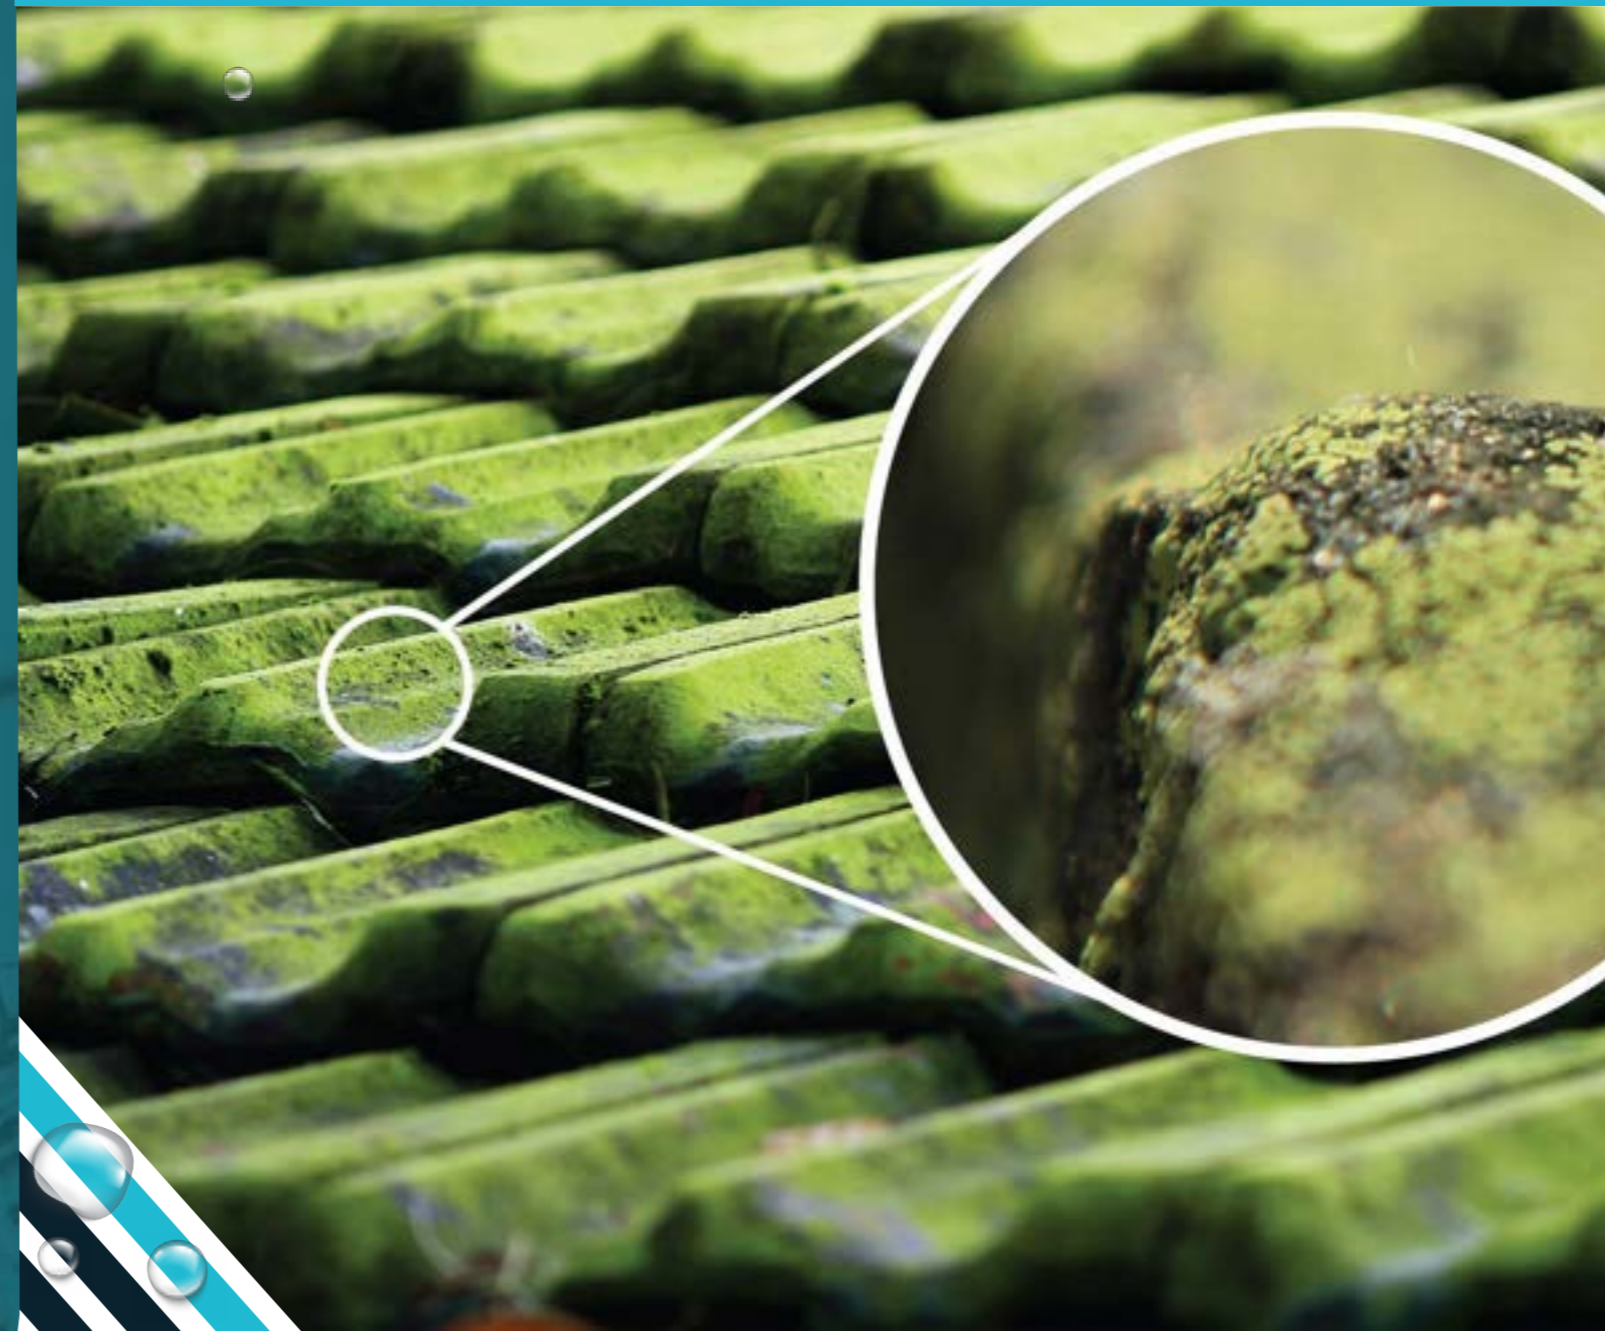

Environmentally Conscious

RubberRoofs™ waterbased Liquid Rubber Paint™ is lead free, low VOC and dispatched in recycled, recyclable packaging. Our substrate bio organic sanitizers is specifically developed to be safe and our algae control systems to be antiseptic.

Coastal and Southern regions have 100% algae, fungi or moss prevalent. RubberRoofs™ applicators sanitise EVERY ROOF with AlgenTech™ in the preparation stage and AlgenTech™ XE Protect, our dry state microbial fungus and algae attack protector, is added to the Liquid Rubber Paint™ to inhibit future organism growth. This process considerably lengthens the lifetime of waterproofing.

RostTech™ Rust Treatment

RostTech™ Rust Treatment converter is our expertly formulated, full function, water-based rust converter.

With thorough preparation, RostTech™ Rust Treatment penetrates deeper than standard converters into rust and converts rust into a stable, inert ferric phosphate compound that together with the built-in primer element, forms an effective barrier layer of protection from further corrosion.

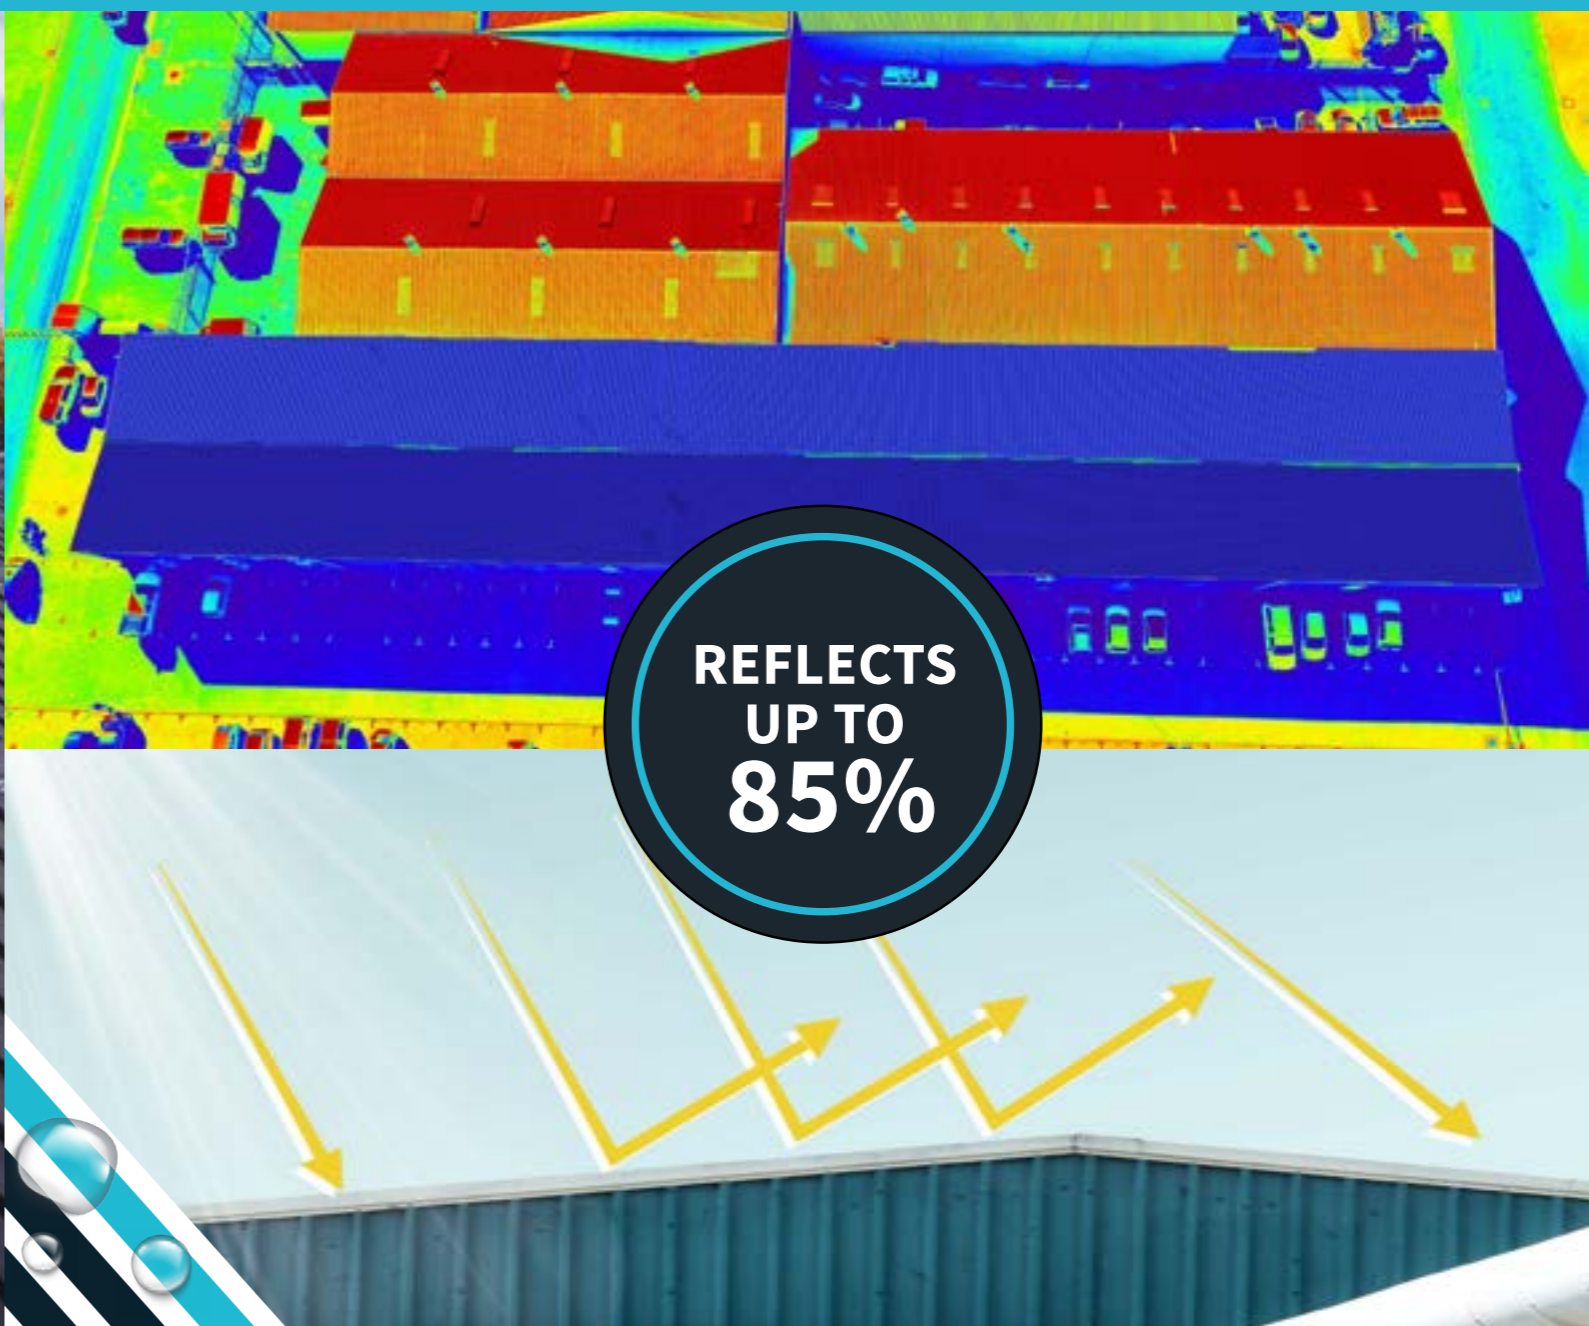

ThermoTech™ Cool Roof Technology

Next generation ThermoTech™ Titanium Liquid Rubber Paint™ effectively reflects up to 85% of Infrared and UV radiation, instead of allowing heat to be transferred into the building. ThermoTech™ Cool Roof Technology substantially contributes to a building's process efficiency, comfort, savings in energy and running costs while further extending the life of infrastructure.
