

Frederik Nel CEO-CURASURE

10 Year Maintenance Plans

- What does it entail
- How is the 10-year maintenance plan drafted
- •• How will the 10-year maintenance plan be applied and managed

Presenter: Frederik Nel (Curasure)

Where do we stand

It is almost 3 years since the introduction of the Legislation and specifically the Maintenance Plan and Reserve Fund requirements.

How are we doing?

Have you found the winning recipe?

Are all your schemes compliant?

What are your challenges?

What is the size of the market and challenge?

BILL RAWSON

CSOS ANNUAL REPORT2017/2018

Chairman at Rawson Property Group April 2017

- well over 700,000 sectional title homes
- more than 6-million people
- value of sectional title property at around R665bn

The information obtained from Deeds Office indicates that there is a total of **76 677 registered Sectional Titles** in South Africa.

Between 01 April 2017 to 31 March 2018, a total of **17 446** of community schemes were **registered**

The total number of Sectional Titles registered with the CSOS is 20 969 with the remainder of **56 705 not registered** with the CSOS.

The total registered with CSOS represent **27,7%** of total Sectional Titles Schemes in South Africa.

What is the size of the market and challenge?

Number of schemes - 76,000

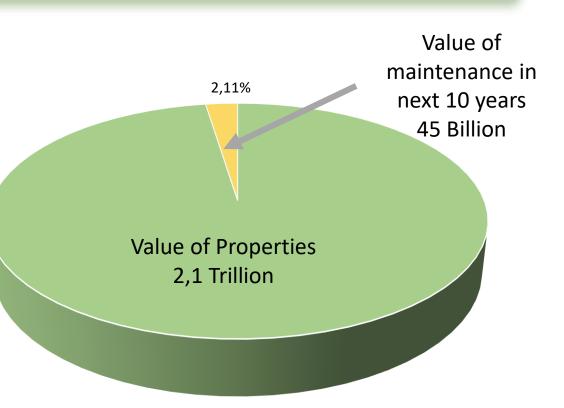

Number of Sections (30 ave) - 2,280,000

Number of residents (3 ave) - 6,840,000

Value of Property (950,000) - 2,166,000,000,000

Maintenance spend in next 10 years (20k per unit) - 45,600,000,000

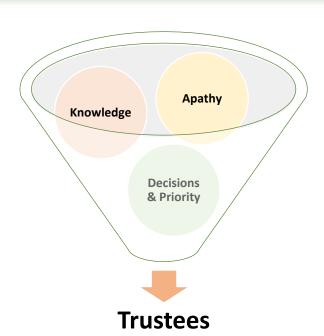

MA yearly fees at R95 / month - 2,599,000,000

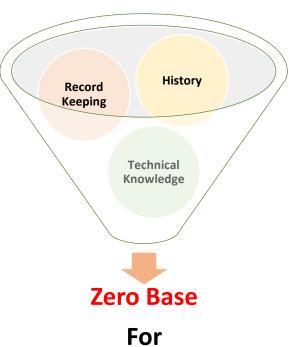

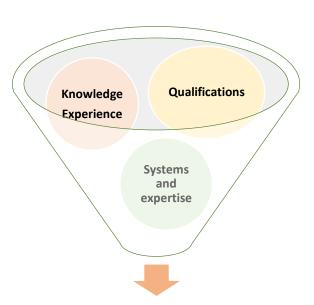

Challenges

and their Qualifications

Maintenance Plan

Managing Agents & Industry

What does it entail = What is our understanding?

- Maintenance Plan (MRRP)
- 10-Year Forecast
- Separate Budget
- Separate Bank Account
- Accounting and Records
- Funding and Contributions
- Annual review and presentation at each AGM

No Legal stuff today,

Speaking to experts

What does it entail = Why should we maintain?

- To protect the Asset Value Our Investment
- Managing the cost of maintenance over life of asset
- Arresting of failures
- Preventing of failures and degradation / increased long-term costs
- Increased value of well-maintained asset (a healthy community!)
- It is a fiduciary requirement in Law due to the fact that we manage buildings and infrastructure on behalf of the entire community and investors

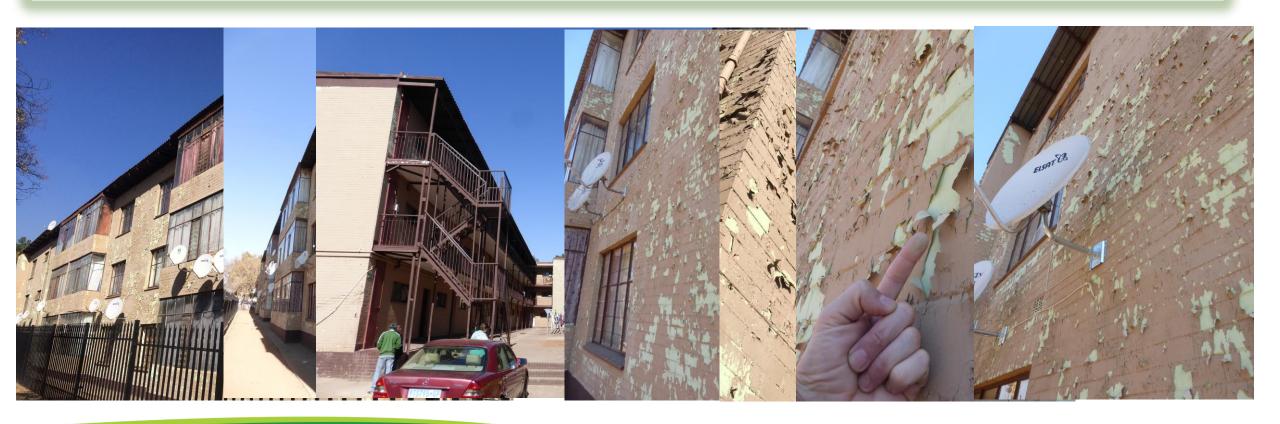

= Which property would you invest in?

What does it entail = Which property would you invest in?

OR

What does it entail = Same Building?

What does it entail = Which property would you invest in?

If you want to measure what you value,

or wish to protect,

look at your budget,

and you'll know where the value is positioned.

= What are we maintaining?

Communities

Where people celebrate birthdays

Their first property

The safe place where parents let their kids play

Where friends meet

The place they call HOME

What does it entail = What are we maintaining?

- Common Property
- Building structurers the Building Envelope
- Freestanding structures (Carports, boundary, etc.)
- Infrastructure (Roads, dams, etc.)
- Services / Systems (Electrical, Plumbing, Security, Solar etc.)
- Plant and machinery (Lifts, Generators, etc.)
- Consumption / use and needs (Energy, Water, Waste, sustainability, etc.)

What does it entail = What are the categories of maintenance?

- Re-active maintenance
- Planned maintenance
- Pro-active maintenance
- Day-to-day (ongoing) maintenance
- Capex / replacement
- Emergency repairs (unplanned sudden event)

What does it entail = What is the ideal maintenance scenario?

- Full sight and records of past maintenance
- Detailed past record of maintenance per item and category
- Accurate assessment of current condition (Technical assessment)
- Breakdown of requirements, per item and maintenance category
- Projections for current and planned maintenance, per item & category
- A Marriage between technical and financial requirements presented on a projected time-line

ZERO BASE

= it is three distinctly different boxes

Maintenance Category

- Common Property
- Building structurers the Building Envelope
- Freestanding structures (Carports, boundary, etc.)
- Infrastructure (Roads, dams, etc.)
- Services / Systems (Electrical, Plumbing, Security, Solar etc.)
- Plant and machinery (Lifts, Generators, etc.)
- Consumption / use and needs (Energy, Water, Waste, sustainability, etc.)

Type of Maintenance

- Re-active maintenance
- Planned maintenance
- Pro-active maintenance
- Day-to-day (ongoing) maintenance
- Capex maintenance / replacement
- Emergency repairs (unplanned sudden event)

Planning for Maintenance

- Separate Maintenance Categories
- Identify and list items per Category
- Determine type of maintenance required
- Review Current Condition
- Evaluate and estimate
- Breakdown per category, items and type of maintenance being planned for

= What is the ideal maintenance scenario?

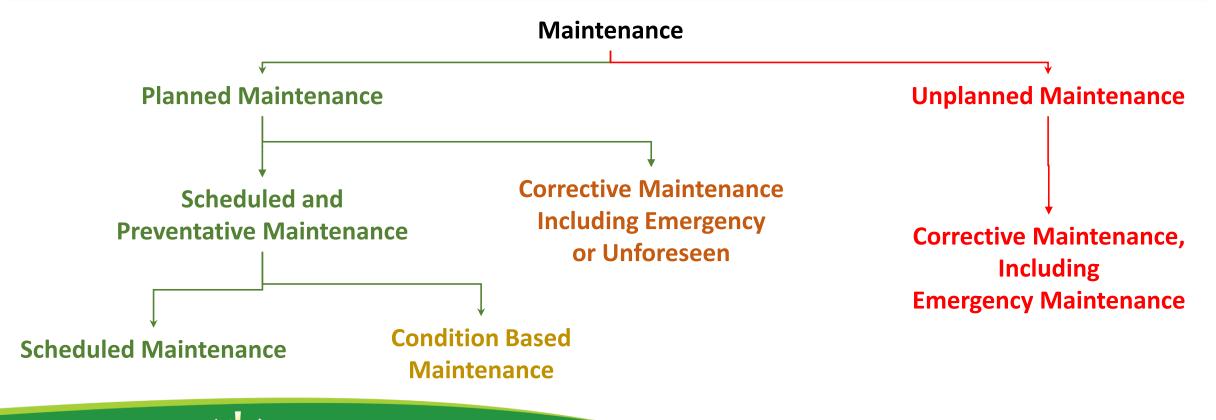

Study and review records (Past history and facts) Visual inspection of condition (List per Category) Technical Review & Solution Development (Per Type of Maintenance) Repeat Formalize per category and component with estimates and projections Annually (8) **Budget development** Review and finalize Implementation

= Maintenance Matrix

= Technical challenges?

Historical Information

Conflicting views & personal preferences

Lack of Budget and Records

Separating Categories of Maintenance

Technical Nature of Maintenance

Ageing Infrastructure

Trying to fit a square peg in a round hole

No wonder Trustees?

What does it entail = Making it achievable?

Is it not our duty and responsibility to make it easier and more achievable for trustees?

What are the solutions we are presenting to Trustees?

Do we have a step by step process to guide the trustees?

Life is just easier in 3's?

Let's take a practical approach

"Since we cannot change reality, let us change the eyes which see reality.' Nikos Kazantzakis

10-year maintenance plan = Before we start - List of items per Category

<u>Category A – Building Envelope and Freestanding structures</u>

Roofs / Walls / Windows / Carports / Boundary walls / etc.

Category B – Ongoing and day-2-day

Plumbing / Electrical / Swimming Pool / Gate Motors etc.

<u>Category C</u> – Speciality and Unqualified

Roads / Lift Replacement / Mechanical / Replacement / etc.

10-year maintenance plan = Step 1 Planned maintenance

<u>Category A – Building Envelope and Freestanding structures</u>

Sample BC	Current	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	Year 9	Year 10				
Area	Condition	First Cycle	Frequency of cycles	Estimate	2020	2021	2022	2023	2024	2025	2026	2027	2028	2029	Total

BOUNDARY AND FREE-STANDING WALLS (Painted)	FAIR	2021	4	40 000	_	40 000	_	_		40 000	-	-	-	40 000	120 000
GENERAL (Metal, wood, gates)	FAIR	2021	3	15 685	-	15 685	-	_	15 685	_	-	15 685	-	_	47 056
Contingency (10%)				35 069				_	4 569		-	4 569		4 000	
TOTAL				385 754		314 254		-	50 254			50 254			865 762

10-year maintenance plan = Step 2 Day-2-day maintenance

Category B – Ongoing and day-2-day

ONGOING AND DAY-2-DAY	Last years spend	Future maintenance	Approved budget
ENTRANCE & ACCESS			
Entrance Gates, Gate Motors, Booms, Access Control, Security Systems and Guardhouse	9 600		10 272
ROAD SURFACING & TRAFFICABLE AREAS			
Paving	6 500		6 955
SWIMMING POOL AND CLUB HOUSE			
Swimming Pool and Pump	30 000		32 100
ELECTRICAL			
Electrified Fencing	3 500	25 000	3 745
Electrical Installations	5 000		5 350
PLUMBING			
Reticulation and Plumbing	36 000		38 520
Water-Tanks or Pump Systems	12 000		12 840
Fire Lines	3 500		3 745
SURFACE DRAINAGE AND / STORM-WATER SYSTEMS			
Surface Drainage And / Storm-Water Systems	-	30 000	-
GARDENS AND LANDSCAPING			
Gardens & Landscaping	42 000		44 940
OTHER & GENERAL			
Satellite and Arial Installations	-		-
Fire Equipment & Servicing	4 500		4 815
Pest Control & Rodent Traps	5 500		5 885
SPECIALIST ITEMS			
Lifts - Yearly service contract	30 000		32 100
Total	188 100	55 000	201 267

Administrative / Operational Budget ?

10-year maintenance plan = Step 3 Identify specialist items

Category C – Speciality and Unqualified

SPECIALIST ITEMS	Last years spend	Future maintenance	Approved budget
Lifts - Future maintenance or replacement	-	750 000	_
Installation of water-meters		79 000	
SPECIFIC PROJECTS			
Replacement of Pergolas (options other than wood)	-	25 000	_
Total		854 000	

Action Items:	
Get lift survey report	
Investigate compliance of electrical installations	
Investigate options for pergolas	
Swimming-pool = When is re-lining due?	

In other words: If you don't know – then say: "I don't know or I have insufficient information"

It's better than not knowing what you "don't know"

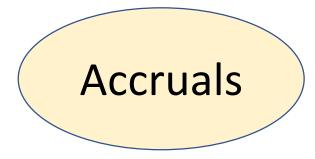

How will it be applied and managed

Let's start by dealing with the elephant in the room

What are accruals and provisions?

'accrual':

Revenue that has been earned but payment has not been received

Business expenses that have been incurred but not yet paid

Provisions, meanwhile, are savings that should be put to one side to cover future expenses, potential liabilities, and imminent losses from pending transactions.

Escalations

Increase in price, especially due to inflation.

How will it be applied and managed - Understanding the relationship

Now let's understand the relationship created in our Act

Maintenance Plan planned maintenance items

Set of accounts

AFS and Financial Reporting

Financial Management and Reporting

Budgets

Admin Fund

Reserve Fund

How will it be applied and managed - Understanding the relationship

What is our interpretation:

AFS and Reporting

Report detailing all information and relationship, past, present and future

Forecast for 10-years Across all categories

A <u>practical approach</u> aligned for prudent and planned management, within the parameters of the Act:

Accruals, provisions and escalation is an accounting & Budget Function, and is not required in the Maintenance Plan
